

### AIRDOS04 - DATA UNIT - service log

| #  | INSERTED | REMOVED | ERASED |
|----|----------|---------|--------|
| 1  |          |         |        |
| 2  |          |         |        |
| 3  |          |         |        |
| 4  |          |         |        |
| 5  |          |         |        |
| 6  |          |         |        |
| 7  |          |         |        |
| 8  |          |         |        |
| 9  |          |         |        |
| 10 |          |         |        |

Data module for AIRDOS04 detectors. Enter the date and time for each performed operation. Use this log to track the handling and servicing of the data module.

- 1) INSERTED – date and time when the module is inserted into the detector
- 2) REMOVED – date and time when the module is removed from the detector
- 3) ERASED – date and time when stored data are erased from the module.
